

Installing Trax:

Open the path to server where TRAX is hosted.

\\<servername>\trax\$

You will see the Windows installer file for TRAX in the setup folder. Run this later to install the TRAX app.

1. Setting the Data Connection

There will also be a 'Trax' folder containing one Traxconnections file (xml). This will be used to connect the app to the database.

> Net	twork > CEP_FS01 > trax\$ > setup >	5 ~	, ○ Search setup
^	Name	Date modified	Туре
	SQLEXPR_x64_ENU	23/02/2021 10:33	Filefolder

	av Auto FTP Manager_7.14	23/02/2021 12:29	Application
	📄 serial	23/02/2021 10:48	Text Document
	1 SQL2019-SSEI-Expr	23/02/2021 10:24	Application
	國 SQLEXPR_x64_ENU	23/02/2021 10:31	Application
ts	SSMS-Setup-ENU	23/02/2021 10:22	Application
	TeamViewer_Host_Setup	23/02/2021 09:26	Application
	JJ TRAX Server Manager_2021.02.22.1	23/02/2021 11:08	Windows Installer
ds	1 TRAX_2021.02.22.1	23/02/2021 11:05	Windows Installer

Copy the Trax folder containing the database connection file.

Navigate to the client's machine on their c drive and open the C:**ProgramData** folder.

Paste the Trax folder directly inside the ProgramData folder. If an older version is already in there, replace it.

Our Paths are now set. Return to the TRAX installer folder, click on TRAX application installer.

2. Installing the Trax App

First run the TRAX_x86 installer

If the AP Processor is required repeat the process with the APProcessorLTPlugin installer

Run the application and click through the steps shown below:

A new window will open. Click 'next' the whole way through until the finish.
